“It’s A Wrap”

Wrapping silverware in napkins is the common way of providing silverware to customers today. Unfortunately, it is a painstaking and costly job for your restaurant to handle. Restaurants either make the waiters/waitresses and/or busboys wrap a quota of napkins or they hire separate people to do the job. In restaurants with very high volume, it’s a combination of both and overtime is paid to reach some of the quotas. This is also not a very hygienic practice since 2 more sets of hands are now handling each piece of silverware after its been washed. One set of hands to sort after the dishwasher and one set of hands to wrap.

Autowraptec has created a unique machine to automatically wrap silverware in napkins and sterilize the silverware during the process. Autowraptec’s “It’s A Wrap” is designed for reliability, usability and ease of maintainability. This machine will surely set a new standard in the industry. Its low cost and compact size makes it affordable and applicable to any size restaurant.

Dirty silverware is put into “It’s A Wrap” proprietary silverware cassettes and then placed into your dishwasher. From the dishwasher, the cassettes are placed directly onto the “It’s A Wrap” machine and automatically wrapped in napkins. An optional UV light can be added that sterilizes the silverware in the machine before they are wrapped if needed. This machine will not only save your restaurant money but will take cleanliness to a whole new level, which will become the standard in the industry. With public awareness of food safety and health at an all time high, this machine will give your restaurant an advantage over the competition.

Specifications:

- Can be customized for either cloth or paper napkins already folded.
- Programmable to wrap 2, 3 or 4 pieces of silverware in any combination.
- One label wrap, pre-printed with self adhesive, placed around each rolled napkin with silverware. All labels come in a roll. Each roll holds 3000 labels.
- Sorted silverware placed into 4 individual cassettes. 2 cassettes side by side under each cover shown. Each cassette can hold 50 pieces of silverware.
- Silverware only fits one way in individual compartments.
- Capable of holding at least 250 paper napkins, or 60 cloth napkins.
- Napkin tray adjustable for napkin size.
- 110 VAC with start/stop buttons and LCD display diagnostics.
- Optional UV light for sterilization of silverware before it’s wrapped.
- Capability of wrapping 250-300 sets of silverware per hour depending upon amount of silverware in each wrap.
- Silverware cassettes can be filled with dirty silverware, placed into dishwasher and then directly onto machine for wrapping.
- Wrapped silverware delivered to a removable bin.
- Size – 36”w x 30”deep x 28”high
- MTBF > 1500 hours
- One year full warranty
- Cabinet version available to store napkins and bands underneath

“It’s A Wrap”
